Relocating to new site 2019

Massive Price Reduction now!

We have commenced earthworks at our new site in Takatu Rd, Matakana. Although the new nursery is just down the road, we want to avoid having to relocate all our BIG native trees, so we're clearing them out over the next season.

Volume purchases, especially on our 45L bags, are attracting huge price reductions – some are down to ONLY \$65 each.

The online Price List currently reflects these reductions but we encourage landscapers to request quotes on all multiple requirements. Have no doubt - we will offer prices just like they were in the old days – we really don't want to carry hundreds of BIG STAGE native trees down the road if we can help it!

Our new site needs a fair bit of work to level it out for the nursery, and the setting up of rows, plus installing irrigation & frost protection. We will also have a small retail presence for last minute tree needs.

It will be fantastic but we just have to hold our breath and wait ... While we do, ask us for great pricing on volume multiple 45L bagged native trees, and more.
